

Thank you for taking this important step to finally starting close this big loophole in the CAFE Standards. It's about time our biggest gas-guzzlers had some accountability. I fully support efforts to implement CAFE standards on all passenger automobiles, especially on the larger vehicles that have previously been unaffected by CAFE Standards. While you're at it, please strengthen ALL CAFE standards. We can do better than we are, and that is an important step in the effort to attain energy independence.
